

# DEV PATEL

Ahmedabad, India 382443 | +91 9081070503 | devrpatel0201@gmail.com

## Introduction

- Graduate with a **Master of Science in Information Technology (M.Sc.IT)** and over **2 years of experience** in software development. Skilled in **frontend and backend development**, manual testing, SQL Server database management, as well as maintaining design systems and implementation of both static and dynamic projects.

## Education

### Master of Science: Master of Science in Information Technology

GLS University

Feb 2023

Ahmedabad Gujarat

### Bachelor of Science: Bachelor of Computer Applications

Gujarat University

Apr 2021

Ahmedabad Gujarat

## Skills

Programming Language: JAVA-8

Frameworks/Libraries: Hibernate, Spring, Spring Boot, Struts, React JS, JUnit

Web Technologies: JSP, Servlet, Java scripts, jQuery, HTML, CSS, React JS

Database Management: Microsoft SQL Server, MySQL

Tools: Eclipse, Jira

Build tool: Maven

Repositories: GitHub

Operating System: Windows, Linux/Ubuntu, MAC, MS Dos

## Achievement

Udemy- Master Microservices with Spring Boot and Spring Cloud

## PROFESSIONAL EXPERTISE

- Designed and developed **robust web-based applications** using **J2EE Technologies**, ensuring **scalable** and **maintainable code**.
- Utilized Struts and **Spring frameworks** for building enterprise-level applications, **enhancing performance and reliability**.
- **Implemented Hibernate** for efficient database interactions, improving data **retrieval and manipulation**.
- **Applied Agile methodologies**, actively participating in daily stand-ups, using **Jira for project management**.
- Managed application servers such as **Tomcat and JBoss**, optimizing deployment and configuration for various environments.
- Conducted **manual testing** to ensure high-quality software, **executing test cases** and **identifying issues directly**.

- I know about **CI/CD pipelines**, but I haven't used them at work yet. Still, I understand how important they are for modern software development.

## Experience

### Junior Java Developer

NetXs Solutions

Feb 2023 - Current

Ahmedabad

- **Current Project** : Procure Port Project : [<http://www.procureport.com>]

1. **Project Name** : Procure Port Project
2. **Position**: Junior Software Engineer
3. **Technology**: Java 1.7
4. **Scripting Languages**: HTML, CSS, JavaScript, jQuery, ReactJS
5. **Frameworks**: Struts, Hibernate
6. **IDE Tool**: Eclipse neon
7. **Database**: Microsoft Sql Server 2014
8. **Web Server**: JBOSS AS1.7

- **Description:**

Procure Port enables businesses to **buy and sell supplies and services over the Internet**. It can create **multiple auctions**, like **reverse auctions**, **forward auctions**, and many more. It can also **create RFI, RFQ, and RFP** for the **question repository** and the ability to release addenda. Involved in the award facility and auction engine. Created functionality to award a bidder according to a different award amount with a proper unit name and quantity with a proper currency. It will calculate award amount per bidder. The bidder can edit that amount according to their wishes until the award is confirmed by the logged user.

- **Responsibility:**

- **Fixing bugs** and vulnerabilities in the openText portal.
- I **worked** on **Quick E-Auction, RFX, RFP, RFQ, RFI**, and **auction issues**.
- I worked on **Add Item by Search (one type of add product in the cart)**, Punchout issues, and P2P Purchase Order issues.

### Freelance Feedback Software

Self-Employed

Mar 2024 - May 2024

Ahmedabad (Remote)

- I am working as a freelancer in feedback software development. My role involves creating dynamic forms with various fields for customers and, on the admin side, displaying lists, implementing filters using Java, and providing options for file downloads in both CSV and PDF formats.
- I also manage the backend, including creating and managing database tables.
- I also have knowledge of the CI/CD pipeline, which allows me to host my dynamic website on 000webhost.
